Schüsckhe will present innovative washbasin solutions at Aircraft Interiors Expo 2019

Kirchentellinsfurt, 22 February 2019 – *From 2th to 4th of April 2019, Schüsckhe will exhibit in Hall B6 at stand E90/J at the Aircraft Interiors Expo (AIX) in Hamburg. Schüsckhe, the undisputed global leader in innovative solutions using the solid surface material Varicor[®], will present its latest innovations at the Aircraft Interiors Expo (AIX) in Hamburg, focusing on two key domains: Anti-bacterial coatings and heat release.*

Anti-bacterial washbasin coatings prevent the growth of bacteria and germs. Lavatories are hotspots for germs as these places are subject to substantial human interaction during flights. The antimicrobial coating allows for a considerable increase in cleanliness by reducing the presence of harmful germs and bacteria on the washbasin surface.

“We want to show our customers and airlines how they can reduce time and money spent on cleaning during flights. So, this allows the crew to have time to take care of other important things”, explains Thomas Mauthe, Managing Director of Schüsckhe GmbH & Co. KG.

Another development is in the field of heat release and the material now meets the requirements for the heat release rate in cabins.

The company is no longer only just active in the lavatory sector but is also expanding its product portfolio to the galley and cabin.

These new developments by Schüsckhe present a variety of ideas that offer aircraft manufacturers and airlines numerous advantages and create significant added value for passengers. Schüsckhe now positions itself in the market as "more than just washbasins".

About Schüsckhe

The Schüsckhe Group, Kirchentellinsfurt, Germany, is a processing company for products made of the solid surface material Varicor®. The group has produced customized products for the aerospace industry, commercial public sanitation sector and housings for medical technology for the past 32 years.

The group is a First-Level-Supplier and Original Equipment Manufacturer (OEM). The products and business procedures are certified in conformity with EASA 21G and EASA 145. In all fields of business the highest quality aviation standards are adapted and applied. Schüsckhe offers turnkey solutions for all requirements:

For fitting out lavatories in First Class, Business Class or Economy Class, the highest levels of craftsmanship and technical expertise are combined.
